What should you do?

- Stay away from the river.
- Do NOT travel through flood-prone areas.
- Consult only official channels and sources.
- Keep your usual medication ready.
- Keep a flashlight and some means of receiving information nearby (battery-powered radio, charged mobile phone, etc.).
- Request assistance in case of special needs.
- Watch over the safety of your pets.
- Always keep your phone charged and pay attention to warnings and updates.
- If your relatives are isolated, do not try to reach them. Call 1·1·2.
- Follow the instructions of the authorities and your local council before returning home after the evacuation.

KEEP THIS LEAFLET AND ALWAYS HAVE IT AT HAND

How will the evacuation take place?

In the event of dam failure, the measures to be adopted by the population are to move away from the flood-prone area and go up to the upper floors of buildings.

The Director of the Dam Emergency Plan will report the danger of dam failure. If you have to move away and/or go up to upper floors:

- You will receive warnings from the local authorities and Civil Protection.
- The sirens located in the flood-prone area will sound.

ALERT SIGNAL

Three 60-second sections of sound frequency, each section separated by two 5-second silences.

END OF ALERT SIGNAL

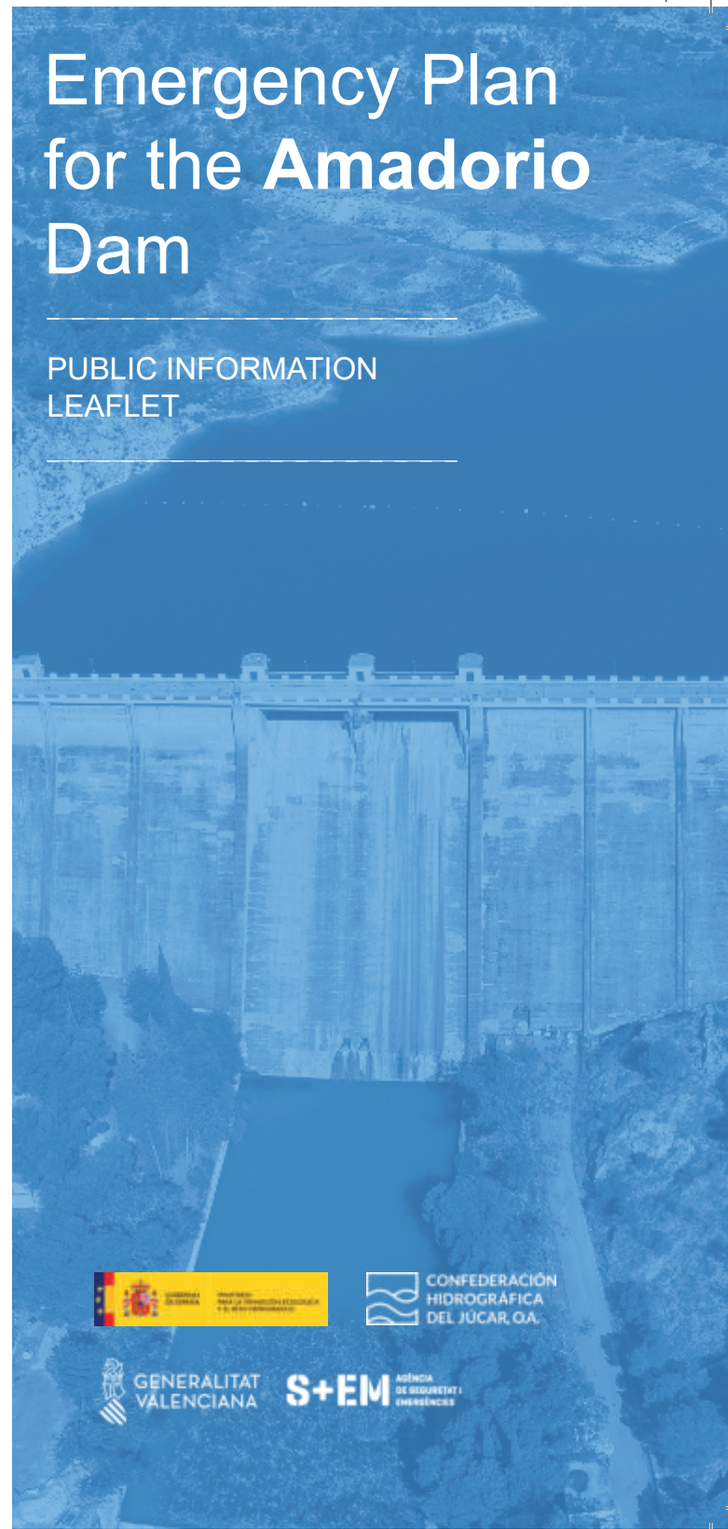

Continuous 30-second sound emission.

OFFICIAL CHANNELS

- In an emergency, call **1·1·2**
- Receive warnings on the App: **GVA112avisos**
- Follow emergency information: **@GVA112**

Amadorio Dam Emergency Plan

POTENTIALLY FLOODABLE AREA

GENERALITAT VALENCIANA · S+EM

Map edition: May 2026

SCALE 1:15.000

1 cm = 150 m

LEYENDA

- Potentially floodable area
- Warning point
- Evacuation route
- Assembly Point (A.P.)
- Evacuee shelter (S.)

Severe impacts according to the Emergency Plan:

- Isolated house
- Small number of houses (between 2 and 5)
- Bridge
- Secondary Road
- Isolated industrial facility

- Bridge
- Ford
- Spring
- TRAM station

Road network
- Motorways
- National road network
- Diputación local network
- Municipal road network

Other roadways
- Paved roadway
- Unsealed road

Railways
- Tram

Infrastructure
- Power line

Buildings
- Residential block
- Isolated house
- Notable building
- Greenhouse
- Industrial warehouse

Contour lines (C.L.)
- Index C.L.
- Contour interval = 25 m
